

# PREETHAM MURTHY B

## Full-Stack Software Engineer | SaaS & AI Systems

Email:preetham0801@gmail.com | LinkedIn | GitHub | Portfolio

### PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 1+ year of experience building and supporting scalable multi-tenant SaaS platforms. Strong expertise in Angular (TypeScript), FastAPI, and secure API design (JWT, RBAC, Keycloak). Hands-on experience in backend reliability, API debugging, and performance optimization. Familiar with cloud environments, monitoring, and automation, with a focus on building resilient, observable, and production-ready systems.

### EXPERIENCE

#### Flexilant Works - Associate Software Engineer

2025 - Present

- Played a key role in developing Agileo, a multi-tenant low-code SaaS platform: implemented Keycloak-based authentication flows, role-based access control, and BFF integrations.
- Designed, developed, and debugged REST APIs using FastAPI; implemented JWT-based RBAC, tenant isolation, and request-level validation to ensure secure and reliable API performance.
- Integrated gRPC-based service communication for backend orchestration and contributed to PostgreSQL and MongoDB data modeling and query optimization.
- Analyzed logs to troubleshoot issues and improve performance and reliability; contributed to Agile, code reviews, and CI/CD workflows.
- Strong interest in cloud infrastructure, automation, and production support engineering.

### INTERNSHIP & TRAINING

#### AWS Internship Program — Cloud fundamentals and core AWS services (hands-on labs).

2024

#### VASS Software & Solutions — Software Development Intern

2023

- Utilized SQL Server Management Studio to support feature development for a Hospital Information Management System (HIMS), following structured enterprise SDLC practices.

### PROJECTS

#### TruthLens — AI-Powered Multimedia Authenticity Platform

- Architected a modular AI-assisted pipeline for image and video deepfake detection, implementing frame extraction (FFmpeg), frame-level forensic analysis, and a multi-signal authenticity risk scoring engine. Worked on handling large media processing workflows with focus on performance optimization and system reliability.

#### VASS Software and Solutions Corporate Website — Full-Stack Implementation

- Developed responsive frontend features using Angular and TypeScript; integrated third-party APIs and implemented performance-oriented component structure.

#### QuoteVault — Secure Quote Management (Angular + FastAPI + MongoDB)

- Implemented REST APIs and frontend integration for quote lifecycle management; focused on data validation, authentication checks, and clean endpoint design.

### TECHNICAL SKILLS

**Frontend:** Angular, TypeScript, HTML5, CSS3, Tailwind CSS

**Backend:** Python (FastAPI), REST APIs, gRPC, Asynchronous processing, API debugging

**Cloud & DevOps:** Basic GCP (Compute concepts), CI/CD workflows, Docker, Linux (WSL/Ubuntu)

**Databases:** PostgreSQL, MongoDB, SQL | **Tools:** Git, Docker, Postman, WSL/Ubuntu, Agile

**Monitoring & Debugging:** Log analysis, API troubleshooting, performance optimization

**AI / Media:** LLM API integration, Claude, FFmpeg, media processing

### EDUCATION

B.Tech — Computer Science & Business Systems, Sri Eshwar College of Engineering

(2021–2025)

### CERTIFICATIONS & ACHIEVEMENTS

AWS Foundational | SQL Certification — **HackerRank** | Best Team — OneYes Hackathon (**SkillSync**) |

Solved 200+ LeetCode problems (**Public Profile**) | Data Structures and Algorithms Certification — **Udemy**
